Round Rock could face tighter watering restrictions

With little prospect for significant rainfall in the coming months, Round Rock may be forced to further tighten lawn watering restrictions, Round Rock utilities director Michael Thane told the City Council on Thursday.

The city has been under Stage 2 watering restrictions since Aug. 16. Since then, the city has issued 400 notices and one citation to residents for not following the restrictions.

Under the restrictions, residents with odd-numbered addresses may water with sprinkler systems and soaker hoses on Wednesdays and Saturdays, and residents with even-numbered addresses may water on Thursdays and Sundays. Commercial and multifamily customers may water on Tuesdays and Fridays. Only watering by hand is allowed on Mondays.

The restrictions have reduced water demand in the city 14 percent in the past four weeks, but that's probably not enough with very little rain forecast through the fall and winter months, Thane said.

"I don't want to sound too bleak, but there's not much positive to say over the next few months," Thane said.

Thane told the council that Lake Georgetown, where the city gets a majority of its water, is only 37 percent full. Stillhouse Hollow Lake in Bell County, which also supplies Round Rock water via a 28-mile pipeline to Lake Georgetown, is 63 percent full. Thane told the council if that pipeline had not been built, about 10 years ago, Lake Georgetown would "be a river channel puddle."

Council members asked Thane about the city's options if drought conditions continue as expected.

Some of those options, Thane said, include tightening water restrictions to once a week, then going to Stage 3 restrictions, which prohibit watering altogether. The possibility of getting water from the Carrizo-Wilcox aquifer, from which nearby Hutto gets its water, was also discussed.
